

Request to all prefectural residents

July 23rd

Fukuoka Prefectural Government

○Recently, new cases of COVID-19 infections are rapidly spreading. If the infections continue to spread and it becomes difficult for medical intuitions to handle the cases, then we would have to request business to cooperate and close their business again. This is another crucial period. “We have to do whatever it takes to stop spreading this” and it will depend on everyone’s consciousness and action.

(1) For prefectural residents, to be very conscience of your actions and think that you might be infected and also conscience to “not infect people” and “not get infected from people”

① For outings, on the basis of your health conditions to check the infection situation of your destination, the prevention measures the facility has, and judge on the necessity of the outing. Especially, infections from restaurants with close contact standout. Please refrain form going to places where they lack preventative measures.

② Also when you go out, please follow the use of masks, washing your hands, social distancing, and avoiding the 3Cs.

(2) Next for all business owners.

① To take the necessary preventative measures from the industry specific guidelines. Especially restaurants with close contact needs to take the necessary preventative measures.

② To also have it displayed so visitors and customers will understand it.

○Recently, about 50% of the infection are youths in their 20s and 30s and most of them are asymptomatic people. Especially, for youths to not spread it to elderly who will have serious symptoms, people with preexisting conditions, children who just got to start school again and to follow request from above. Thank you for your understanding and cooperation.
